

AS 9100 Internal Auditor

AS 9100 requires companies to maintain an internal audit process which audits key requirements on a routine basis. The audit process ensures that defined processes are documented, implemented, and are producing the desired results.

The DESARA Group emphasizes the importance of adding value from the audit process, so our main objective is to ensure that you are competent and capable of interpreting the AS 9100 requirements, and auditing your company's processes upon your return. We accomplish this by enforcing key concepts with workshops, case studies, and role plays throughout the class.

Key topics include:

- Understanding the AS 9100 requirements
- Understanding the role of the internal auditor
- Developing audit planning documents
- Conducting the audit
- Practicing effective auditing techniques
- Communicating with the auditee during the audit activity
- Documenting audit results so that they add value to the organization
- Conducting audit close out activities
- Auditing for continual improvement opportunities
